Scott, I don't understand. There isn't an SOW for the RA; the only SOW which exists was for the RD, which isn't applicable here. Either you personally would have to create one, or we could incorporate the approved remedial design into the SSC. However, since the total design is so voluminous, I thought we might be able to adapt the RA work plan for purposes of the SSC. This would be similar to the adaptations which Craig and I made to the model RD/RA consent decree, in which we removed the references to the SOW, and substituted the term "approved remedial design." **You need to decide the best way of incorporating the requirements of the RA into the SSC, and start drafting that text immediately.** Please let me know your thoughts on this issue.

Also, since the State has indicated that it might want to substitute in-kind services for an actual cash outlay, (it's a small amount, only a little over \$27,000) you need to start thinking about what types of services the state might provide.

Finally, since Greg Youngstrom has left Ohio EPA, you might want to confirm who is in charge of managing the Site. In the interim, it's probably Mark Allen, about whom I sent the prior message.

I did not provide any info to Lois, we just talked about what needed to be added to the text, for example, the attachments. Basically, the attachments would be the ROD and SOW. I will have to make up a project schedule for milestones and a list of technical reports to be submitted. As for the issue of the RA, I have not updated the Work Plan. But I will take a look at it to see what items might be missing. The PRPs will need to update the RA if it is needed. If you want to meet next week that is fine with me. Just let me know what day. Thanks, Scott.

I have reviewed the SSC for Skinner, and think that a number of revisions need to be made to the document, to address the situation that there is already a completed remedial design at Skinner. Scott, I know that you told me that you've already provided certain info to Lois. Can you forward that info on to me, as well?

Scott, specifically, did you write anything like a Scope of Work, or in any way update the RA work plan set forth in the design? If not, I think that the three of us should sit down and talk about how this document should look. Thanks.
